**MDL** Method detection limit or minimum reporting limit.

**% Rec** Surrogate compounds are added to the sample in some cases and the recovery is reported as a percent recovered.

**QAQCID** This is a unique reference to the quality control data set used to generate the reported value.

**Data reported for organic analysis in soil samples are corrected for moisture content**

**Matrix** If the matrix is a leachate, the sample was extracted according to regulation 558.

**INT** Interferences

**TNTC** Too numerous to count

**ND** Not detected
